**Bridge Dual Tone Vintage**

*Warm and Power / Strat Vintage.*

**BRDT-V**

**Bridge Dual Tone Plus**

*Powerful and selective with more middle response /Twang master with more punch.*

**BRDT+**

**FULL RAILS DT Bridge**

*Very Powerful, balanced and selective /Strat bridge sound with more middle.*

**BRDT-FR**

We are glad to present you – **STRATOBUCKER™**. Structurally, it is a **Single Coil** sized Humbucker with one exceptional character – the **TONE!**

**STRATOBUCKER™** sounds like a real single coil, but without 60-hz hum, sustain killing magnet pull and string drop outs.

Thanks to our unique “**APG sound modeling technology**” we can to implementin **STRATOBUCKER™** almost all sounds that You need, from **Vintage Strat®**, through **P90®** to **PAF®** or Your own vision [**custom shop**], if You have one!

Moreover, **STRATOBUCKER™** technology allows to create dual sound pickups – **2 in 1** ( humbucker / single) without losing sound quality and absolutely without noise, because in both modes use **both pickup coils**. This makes the technology of **STRATOBUCKER™** the most versatile and revolutionary , which has no analogues in the world ! **STRATOBUCKER™** allows you to receive any combination of sound in the guitar without changing the appearance of the pickup : **S-S-(S/H)** Series **Vintage**, **(S/H)-S-(S/H)** series **Dual Tone** or **H-S-H** Series **HB**.

**S** – sound Single Coil, **H** – humbucker sound  
Each of these series includes several varieties contiguous with sound:  
**Vintage** – 57/62 , Texas Special; **Dual Tone** – 57/62 or PAF; **HB** – PAF, Modern Humbucker, Joe Barden.

### BRIDGE & NECK PU with "DUAL TONE SYSTEM"

**STRATOBUCKER™** Bridge & Neck **DT** is made using unique sound modeling technology “**APG Dual Tone modeling technology**”. This allows for a double sounding without lost of quality in both mode. The pickup has the **Vintage Single** [parallel mode] and **Power Humbucker** [serial mode]. In both modes – **ZERO** noise! The pickup is equipped with 4-conductor shielded cable which sued to obtain all possible modes of operation.

## TELEBUCKER™

## [APG] pickups

### Vintage sounding Neck pickups

**Vintage**

*Vintage power, more harmonics, very selective.*

**TBV-N**

**Blues**

*Texas Power, more harmonics, very selective.*

**TBB-N**

**SB-90**

*P-90 like, more harmonics, very selective.*

**TB-90**

### Dual Tone sounding Neck pickups

**Full Rails Dual Tone Neck**

*Powerful, balanced and selective /Tele with more middle.*

**TBFR-N**

**Dual Tone Plus Neck**

*Powerful, selective and beautiful /Tele with more presence.*

**TBDT+**

**Red Neck Neck**

*Tele sounding with more middle and Punch for **Danny Gatton** fans.*

**TBRN-N**

### Lead Dual Tone sounding pickups

**Lead Dual Tone Vintage**

*Warm and Power / Tele Vintage.*

**LDT-V**

**Lead Dual Tone Plus**

*Powerful and selective with more middle response /Twang master with more punch.*

**LDT+**

**Lead FULL RAILS DT**

*Very Powerful, balanced and selective /Tele bridge sound with more middle.*

**LDT-FR**

**TELEBUCKER™** is our next project based on sound modeling technology of traditional single coil. When we were starting to work on Telebucker we dreamed of creating Telecaster sound at least as good as “**Texas Special**”. Now you can certainly say that we have achieved much greater results! Telebucker been tested by professional bluesman, who typically do not recognize anything except the classic singles. As in the case of **STRATOBUCKER™**, **TELEBUCKER™** is structurally humbucker in the body of a “single coil”. **TELEBUCKER™** sounds like a real **Tele®** single coil, providing a full range of harmonics of classic **Telecaster®** sound, but absolutely without noise! We can not say that this is a complete copy of the classic **Telecaster®** sounds, but you can certainly speak of closest approach and the new dimension of sound in full compliance with the original frequency range of **Telecaster®**.

**TELEBUCKER™** is designed so, that it can be mounted in standard plates without making any changes to the guitar. Pickups is available as a Neck and Bridge. The difference is in the structure and electrical performance.

### BRIDGE & NECK PU with "DUAL TONE SYSTEM"

**TELEBUCKER™ Bridge** and **TELEBUCKER™ NECK DUAL TONE** is made using unique sound modeling technology “**APG Dual Tone modeling technology.**” This allows for a double sound, switched with **Mini Switch** or **Push-Pull**. The pickup has the **Single Coil TWANGY TELE** and **Power Humbucker MODE**. In both modes – **ZERO noise!** The pickup is equipped with **4-conductor** shielded cable which sued to obtain all possible modes of operation [**Serial or Parallel**].
